UNITED STATES INTELLIGENCE BOARD

COMMITTEE ON DOCUMENTATION

Subcommittee on Classification

MEMORANDUM FOR: Subcommittee on Classification

SUBJECT : Subject and Area Code Changes in the 1962 Edition
of the Intelligence Subject Code

1. The subject and area code changes included in the 1962 Edition of the Intelligence Subject Code which were made subsequent to Amendment 3 (SCC-D-4, 11 August 1961) to the 1960 Edition are listed in the attachment to this paper. These changes were approved by the Subcommittee on Classification prior to publication of the 1962 Edition and are being distributed to the Committee members so they will have a complete record of all code changes made to the 1960 Edition and included in the 1962 Edition.

2. As you know many new area rules were added and some were changed in the 1962 Edition of the ISC to conform to the philosophy of area relationships described therein on page vi of the Introduction. Such additions or changes were not included in the attached list, however, unless the related subject entry was listed.

3. Part II is a list of typographical and key-punching errors which appear in the 1962 Edition; corrections will be included when the pages involved are revised.

4. Please advise me how many copies of the attached listing you require for use in your Department or Agency.

STATINTL

Chairman

Attachment:
As stated above.
